

# Domain Name Registration

The following is information on how to register a domain name. If you have any question please feel free to contact us. This is based on the NetworkSolutions.com registration of a .COM domain, other extensions company may vary, but will be similar.

- ① Choose a name and extension
  - The shorter the name and better.
  - .COM is by far the most common extension (75%+ of all domain names are .COM)
- ② To register the name you will need to supply the follow
  - Is the name for a **Individual** or **Business/Organization**
  - **Registrant: Account Holder Information**
    - Name and address of the person or company that owns the domain name
  - **Administrative Contact**
    - The administrative contact associated with a domain name is the individual or contact responsible for handling the administrative aspects of a domain name, such as updating Contact Information and confirming certain domain name modifications. You will need to provide the name and address (or NIC handle) of the person.
  - **Billing Contact**
    - The billing contact associated with a domain name is the individual or contact responsible for handling the billing/payment aspects of a domain name, such as initial and recurring billing. You will need to provide the name and address (or NIC handle) of the person.
  - **Technical Contact**
    - The technical contact associated with a domain name is the individual or contact responsible for handling the technical aspects of a domain name, such as specifying the authoritative DNS for a domain name. You will need to provide the name and address (or NIC handle) of the person.
    - If your domain name is going to be hosted by **Possession Studios** we suggest that you enter the NIC Handle of **WJA85** as the **Technical Contact**
      - A NIC handle is the account identifier used by Network Solutions, Inc. for tracking and customer contact purposes. Register.com does not require NIC handles in order to process domain name registrations.
      - The NIC handle for Bill Johnson of **Possession Studios** is: **WJA85**
  - **Domain servers in listed order** (DNS server information)
    - This is the technical server address of where your domain name is going to be used. Specifically the DNS server location of the server your domain name will be used on. The information needs to be supplied by the hosting company.
      - The following is the information for domain names that are going to be hosted by **Possession Studios**.  
**Primary Server**  
**Host Name:** NS.PACIFIC-COAST.COM  
**IP Address:** 207.67.226.130  
**Secondary Server**  
**Host Name:** NS2.PACIFIC-COAST.COM  
**IP Address:** 207.67.226.146
  - A credit card to charge the domain fee to. Each domain name cost on average \$35.00 per year.
- ③ It normally take 36 to 48 hours for the name to come active.
