POZALITE[®]

POZALITE[®] is a unique concrete/stucco enhancer that improves pumpability, strength and open-time of cementitious materials.

"Better Efficiency Saves You Time And Money."

POZALITE[®]

- ✓ Ends Problems When Pumping Material To Heights & Distances
- ✓ Ends Jerking & Packing Hoses
- ✓ Primes The Pump For Faster, Easier Start-Up
- ✓ Aids End-of-The-Day Cleanup
- ✓ Extends Equipment Life
- ✓ Reduces Maintenance Costs
- ✓ Reduces Shrinkage & Cracking
- ✓ Reduces Water Use
- ✓ Improves Overall Strength
- ✓ Increases Shear & Flexural Strength

The use of **POZALITE[®]** means easier troweling, smoother pumping, greater productivity, better workmanship and faster clean-up.

Manufactured By:

NET WT. 50 lbs. 22.7 kg

POZALITE[®]

POZALITE[®]

Holds Moisture Longer
Allowing More "Open Time"
For Smoother, Easier Screeding
And Troweling.

Instructions For Use:
Add 4 lbs. **POZALITE[®]** to water in mixer, then add one bag of common cement and sand/aggregate.

Clean Up And Start Up:
To lubricate hose and prevent packing, add 1 lbs. **POZALITE[®]** to a water wash before pumping cement.

When used as designed, **POZALITE[®]** presents no safety or health hazards. As a precaution, wear respirator or dust mask to avoid inhalation of dust. Wet material may be very slippery. MSDS available.

Stockton Products[™]

In 1949 Stockton Products[™] developed a welded wire corner called CornerAid[®] to prevent cracking at stress points in stucco. Over the years, we have introduced many unique "wire-corner" products including stainless steel varieties, Plastic Nose Cornerbead (with a PVC nose), ArchAid[®] (for rounded openings) and Weep-Aid[®] (a foundation screed that maximizes the weep area).

Stockton Products[™] expanded into metal vents, reveals and trims. Today, the company manufactures a full line of these products in aluminum, galvanized steel, copper, stainless steel and zinc. Our company is widely known for its responsiveness to requests for custom designs in these products.
